

Summary

The “most full-stack” engineer you’ll ever hire. I work with everyone & I’m good at it—plan requirements for PMs, design Figma mocks & presentations for the execs, spec out API surfaces, propose architectures, & optimise client/server performance for SWEs, deploy & monitor distributed systems for SREs, & report post-live to all. I’m the fastest learner on your team, but I specifically love web technologies, graphics programming, research-backed UX, & developer tooling.

I also dress gothic.

HIRE ME

OPEN PORTFOLIO

Work

Skribble Lab | <1 year | Feb’26—Present

Software Engineer. Skribble Learn.

- Lead the rebuilding of Skribble Learn’s student/parent-facing mobile app for multiple schools.
- Designed & implemented lots of APIs with TDD, & frontends with SDD.
- Won client pitches with a novel role-based AI workflow to create pitch demos, based on the real codebase.
- Randomly found & fixed many PO security & usability bugs in the Laravel backend & React frontend.

LARAVEL/PHP POSTGRES/SQL NEXT.JS/REACT FLUTTER GIT

Bike Bear | 1 year 8 mo | Apr’24—Nov’25

Web Developer. Tech Team.

- Made websites for listed companies—AirAsia (5238.KL), Sime fka. Sime Darby (4197.KL), EcoWorld (8206.KL), Sunway (5211.KL).
- Boosted agentic AI task efficacy via a ground-up standard library & visual+file-based editor for WordPress.
- Fulfilled enterprise requirements by inventing an auditable & high-traffic-capable Docker + WordPress + Git stack.

NEXT.JS/REACT TYPESCRIPT JAVASCRIPT/JSDOC
WORDPRESS/PHP DOCKER TAILWIND/CSS SVELTE GIT

“will develop/design for food” | 11 years | Mar’15—Present

Creative Designer, Developer. Freelance.

- Made 3D ads & branding for listed companies—UEM Sunrise Berhad (5148.KL), AB Builders Group Limited (01615.HK).
- Ideated, designed, developed, deployed, & SEO-ranked, websites for various mom & pop clients.
- Got 12,000 YouTube subscribers, made 2D & 3D mograph commissions (aka. intros) for international creators—Mrwhosetheboss, LachlanPlayz, Pewdiepie

SVELTE/KIT ADOBE SUITE BLENDER EXTENDSCRIPT GIT

Education

Taylor’s University | Apr’20—Nov’23

Bachelor of Design in Creative Media (UI/UX).

- 3.96 CPGA, First Class Honours, 7 Dean’s List placements.
- Vice President of the Virtual Reality club—VorteXR Club.

Projects

Deceitville

VISIT WRITEUP REPO

A sarcastic, 3D game about deceptive design.

- Won Awwwards Site of the Day Honors 19 FEB’23
- UX researched via my dissertation, studying deceptive design (fka. dark patterns).
- Reduced bundle size by 10MB+, with custom build-time tooling that split up 3D models by mesh & re-linked buffers based on hash.
- Invented a novel DOM-bidirectional, SSR-preserving Threlte (Three.js on Svelte) pipeline.

THREE.JS/WEBGL TYPESCRIPT SVELTE/KIT VITE GIT

No MySejahtera

GOOGLE PLAY REPO

An Android MySejahtera replacement for the COVID-era.

- Reached 5K+ downloads. 4.3★ (57 reviews)
- Reverse engineered MySejahtera’s web-app & QR-code formats, whilst still correctly sending declarations.

JAVA ANDROID ROOM/SQLITE GIT

Lim Jia Sheng (2026)

VISIT WRITEUP REPO

A 3D experience & blog, that’s mine.

- Reduced bundle size by 500% (57MB→12MB) with a novel “over-fitting” optimisation for Gaussian Splats.
- Invented a peeling-based, transparency render pipeline, for interop between Gaussian Splats & meshes.
- Implemented a real-time fluid simulation.

THREE.JS/WEBGL SPARK.JS DOT/LOTTIE THEATRE.JS
JAVASCRIPT/JSDOC WORDPRESS TAILWIND/CSS DOCKER GIT

End Speciesism

VISIT WRITEUP

An activist site for species parity & veganism among us.

- Won Awwwards Site of the Day Honors 1 APR’25
- Won CSS Design Awards 1 FEB’25
- Invented an in-browser, WYSIWYG animation workflow.

NEXT.JS/REACT TYPESCRIPT THEATRE.JS DOCKER GIT

Kinetics

VISIT WRITEUP

Flagship site for the playground maker.

- Invented a bespoke, SSGI-enabled, FFmpeg-powered, in-browser tool for rendering 3D visualisations per product.
