

Summary

The overachieving engineer/designer you'll hire & keep. Web technologies, graphics programming, research-backed UX, & developer tooling. I'm formally trained in UX design, & have a strong urge for details. I also dress gothic.

Let me lead & build for you, properly?

Projects

Deceitville

VISIT WRITEUP REPO

A sarcastic, 3D game about deceptive design.

- Won Awwwards Site of the Day Honors 19 FEB'23
- UX researched via my dissertation, studying deceptive design (fka. dark patterns).
- Reduced bundle size by 10MB+, with custom build-time tooling to split up 3D assets into linked shared buffers.
- Implemented SSR preservation for 3D-in-DOM pipelines.

THREE.JS/WEBGL TYPESCRIPT SVELTE/KIT VITE GIT

Jiewo

REPO

A borrow-checker for high-performance TypeScript.

- Sped up benchmarks by 50% by rewriting high-performance code with Jiewo's build pipeline.
- Implemented the borrow checker using only the TypeScript type system & a macroing compiler plugin.

TYPESCRIPT RUST GIT

No MySejahtera

GOOGLE PLAY REPO

An Android MySejahtera replacement for the COVID-era.

- Reached 5K+ downloads. 4.3★ (57 reviews)
- Reverse engineered MySejahtera's QR-code format & web-app (unminified btw).

JAVA ANDROID ROOM/SQLITE GIT

Lim Jia Sheng (2026)

VISIT WRITEUP REPO

A 3D experience, experiment, & blog, that's mine.

- Reduced bundle size by 5x (57MB→12MB) with a novel “over-fitting” optimisation for Gaussian Splats.
- Invented a peeling-based, transparency render pipeline, for interop between Gaussian Splats & traditional meshes.
- Implemented a real-time 2D fluid simulation.
